

As an Association Management Company for non-profit associations (both 501c6 and 501c4), if the ruling from the FCC regarding a new law to NOT fax our memberships any materials without written permission goes through, it could result in severe delays in conference registrations, membership renewals, and important information. I am highly opposed to this new law, as our members constantly ask us to fax things over, but don't always reply to mail and asking them to put their signature on file for this kind of communication seems to tie our hands even further. PLEASE do not put this ruling into effect. Thank you, owner, Support & Office Solutions - Conni Ingallina
